Réparer : c'est comprendre.

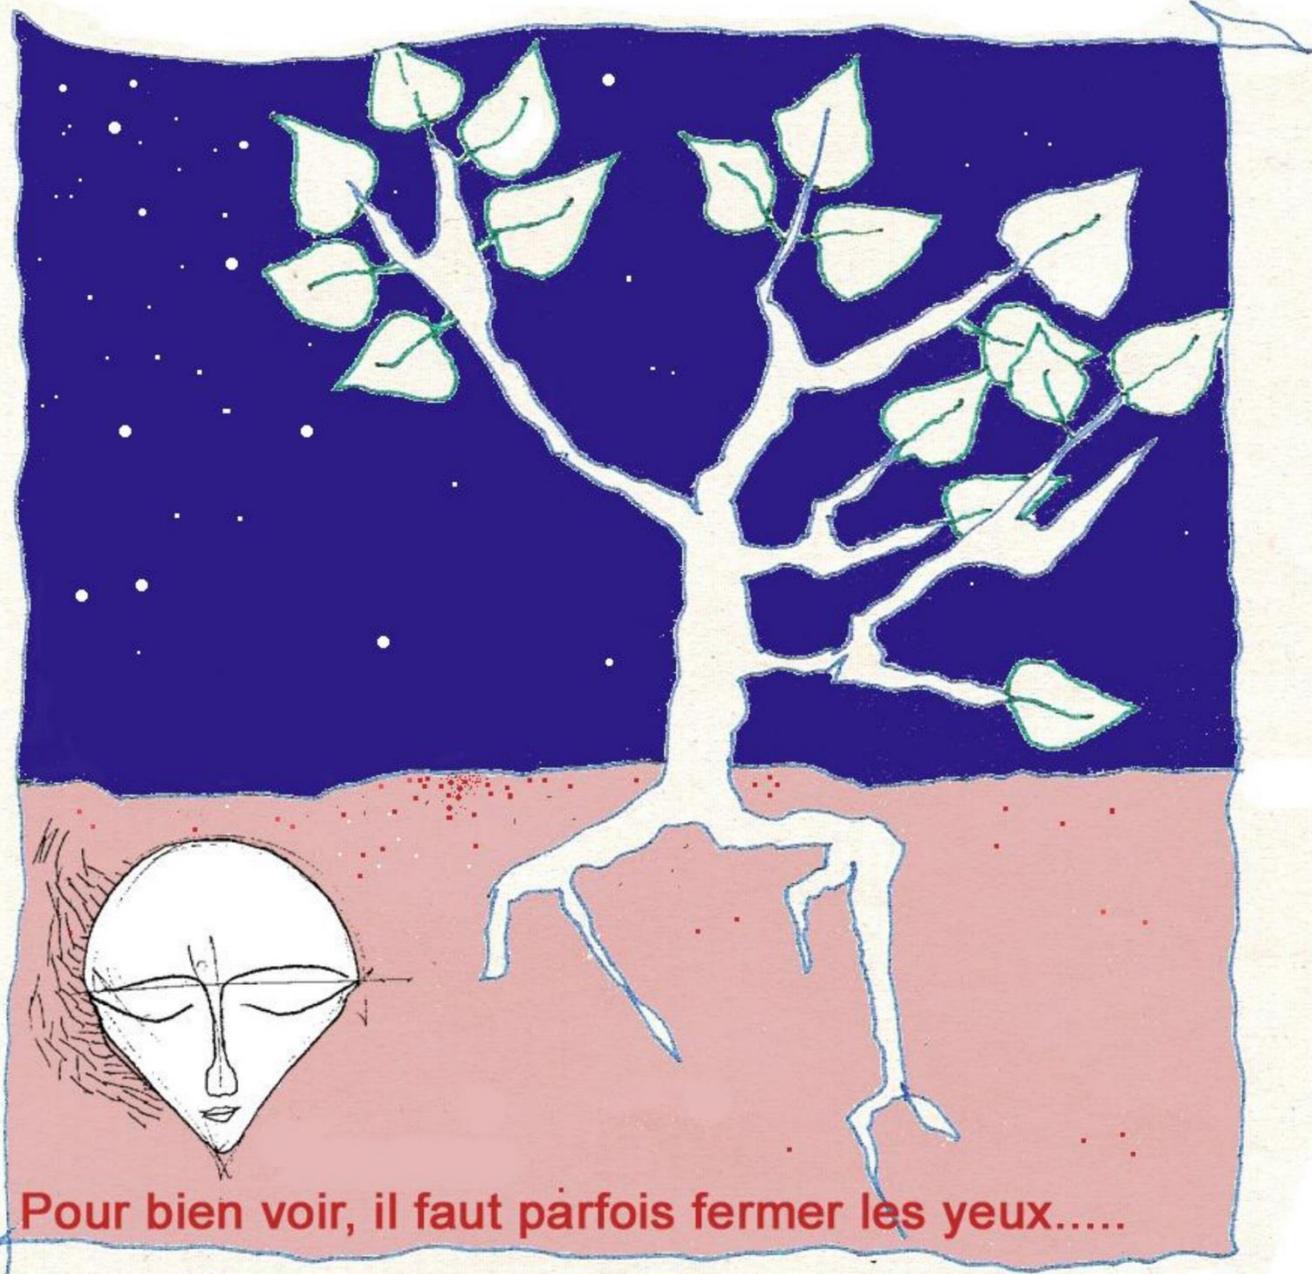

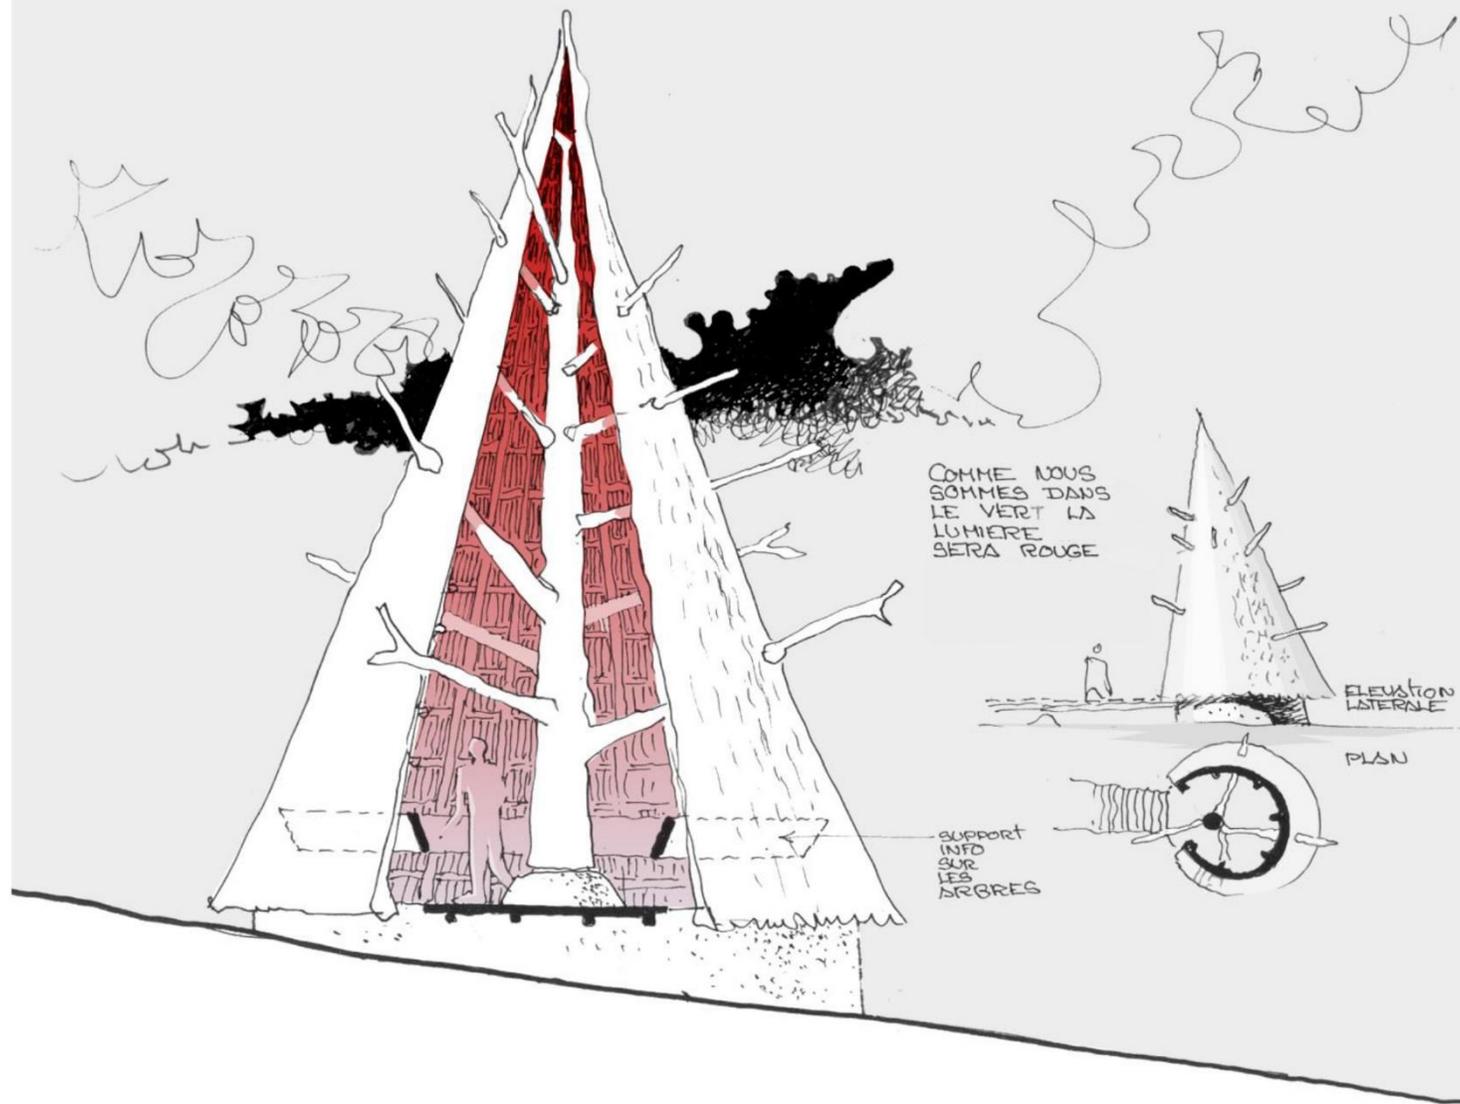

DESCENTE DU CHEMIN DU TEMPS

Pour bien voir, il faut parfois fermer les yeux.....

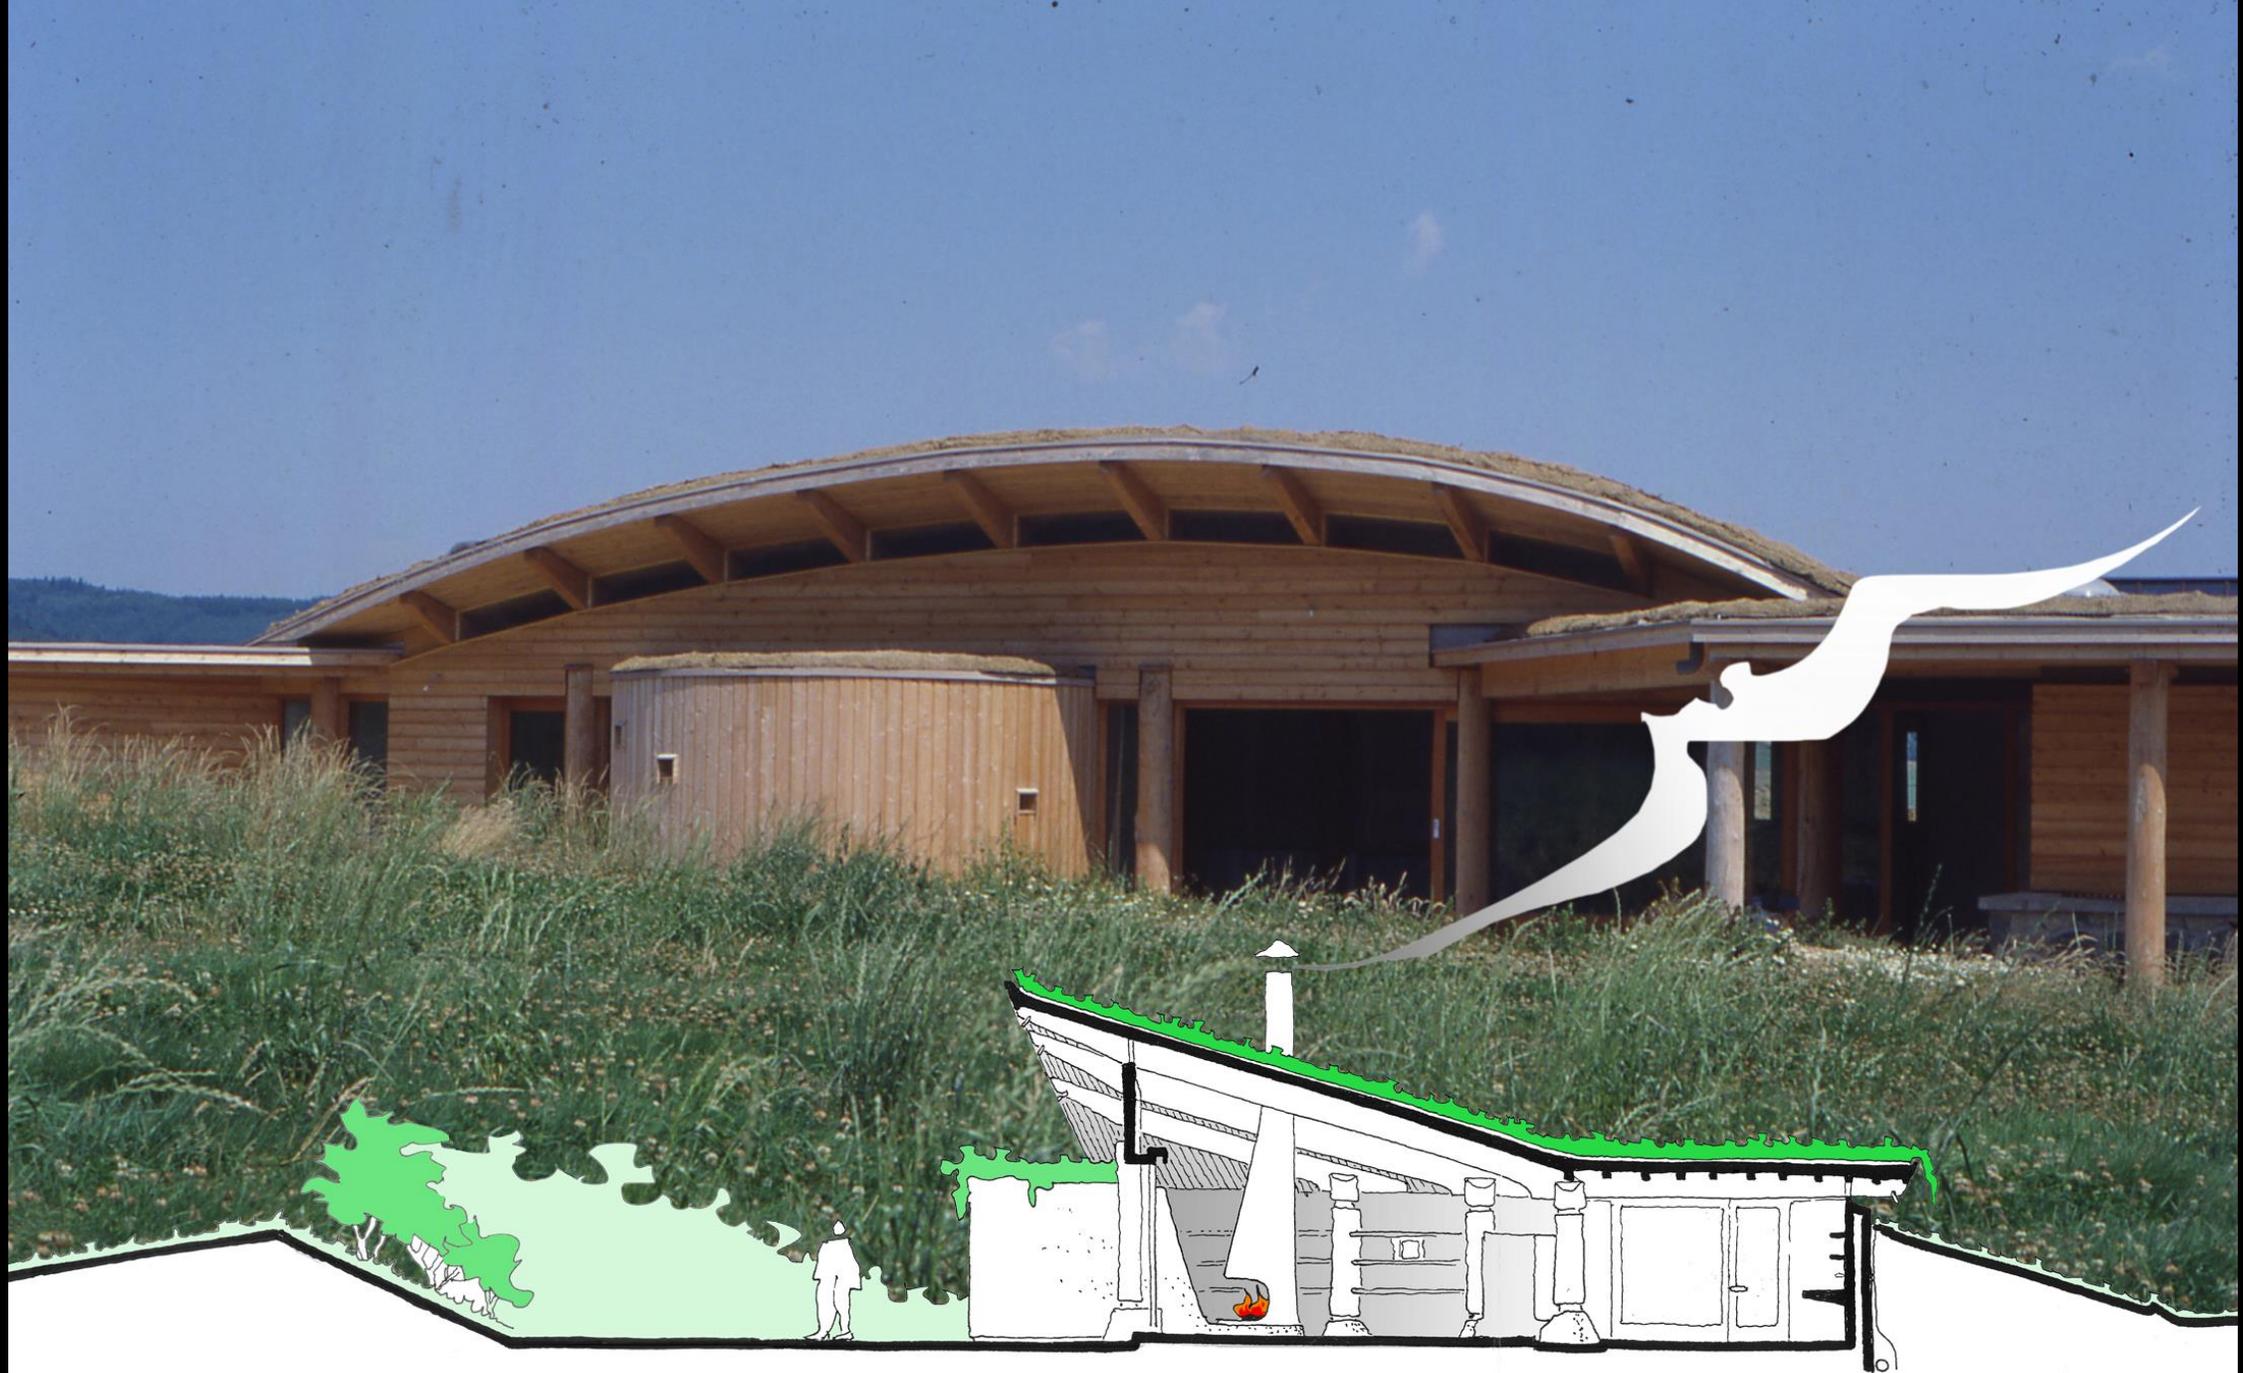

**Pour rêver, vraiment rêver.....,
.....il faut être concret, vraiment concret.....**

Dessin extrait d'un rendu de concours en Belgique

Le sourcier
localise
les veines d'eau

Le puits

L'arbre

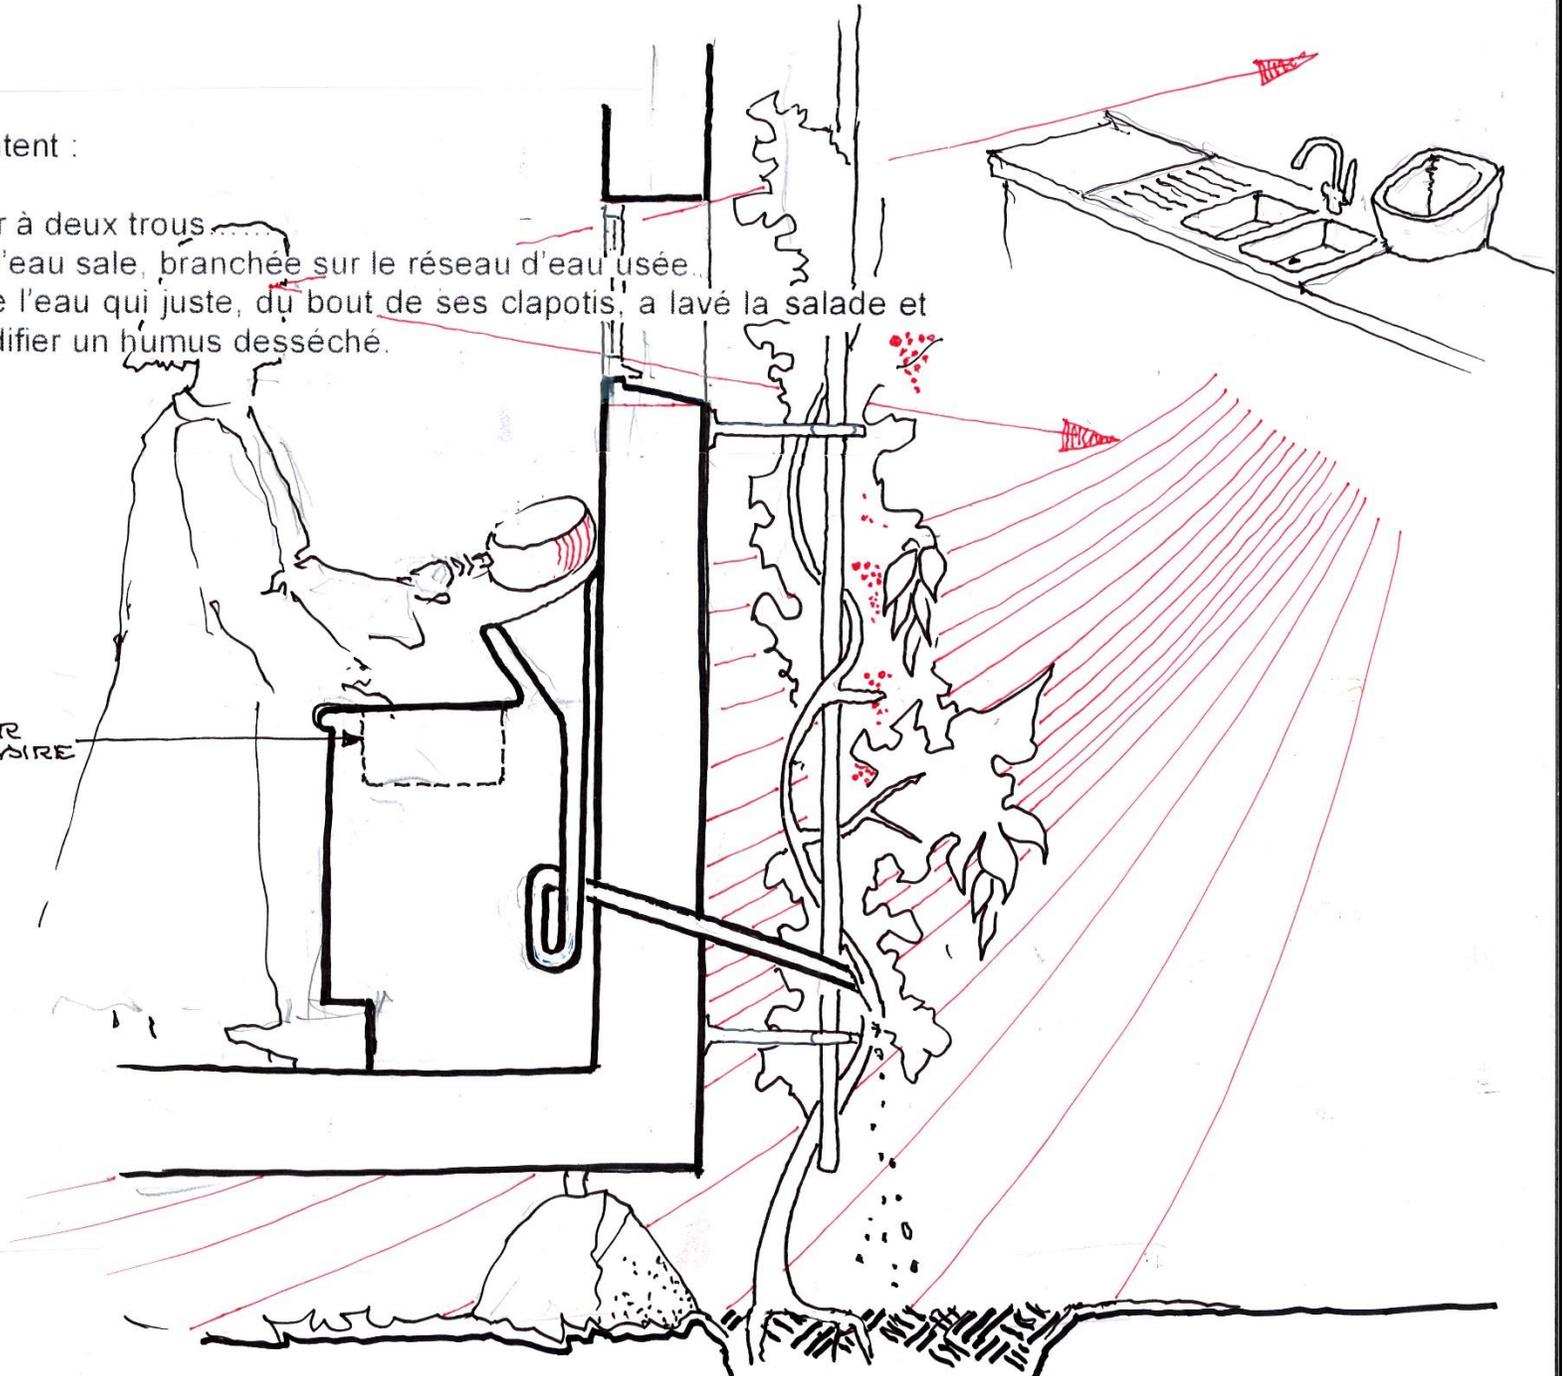

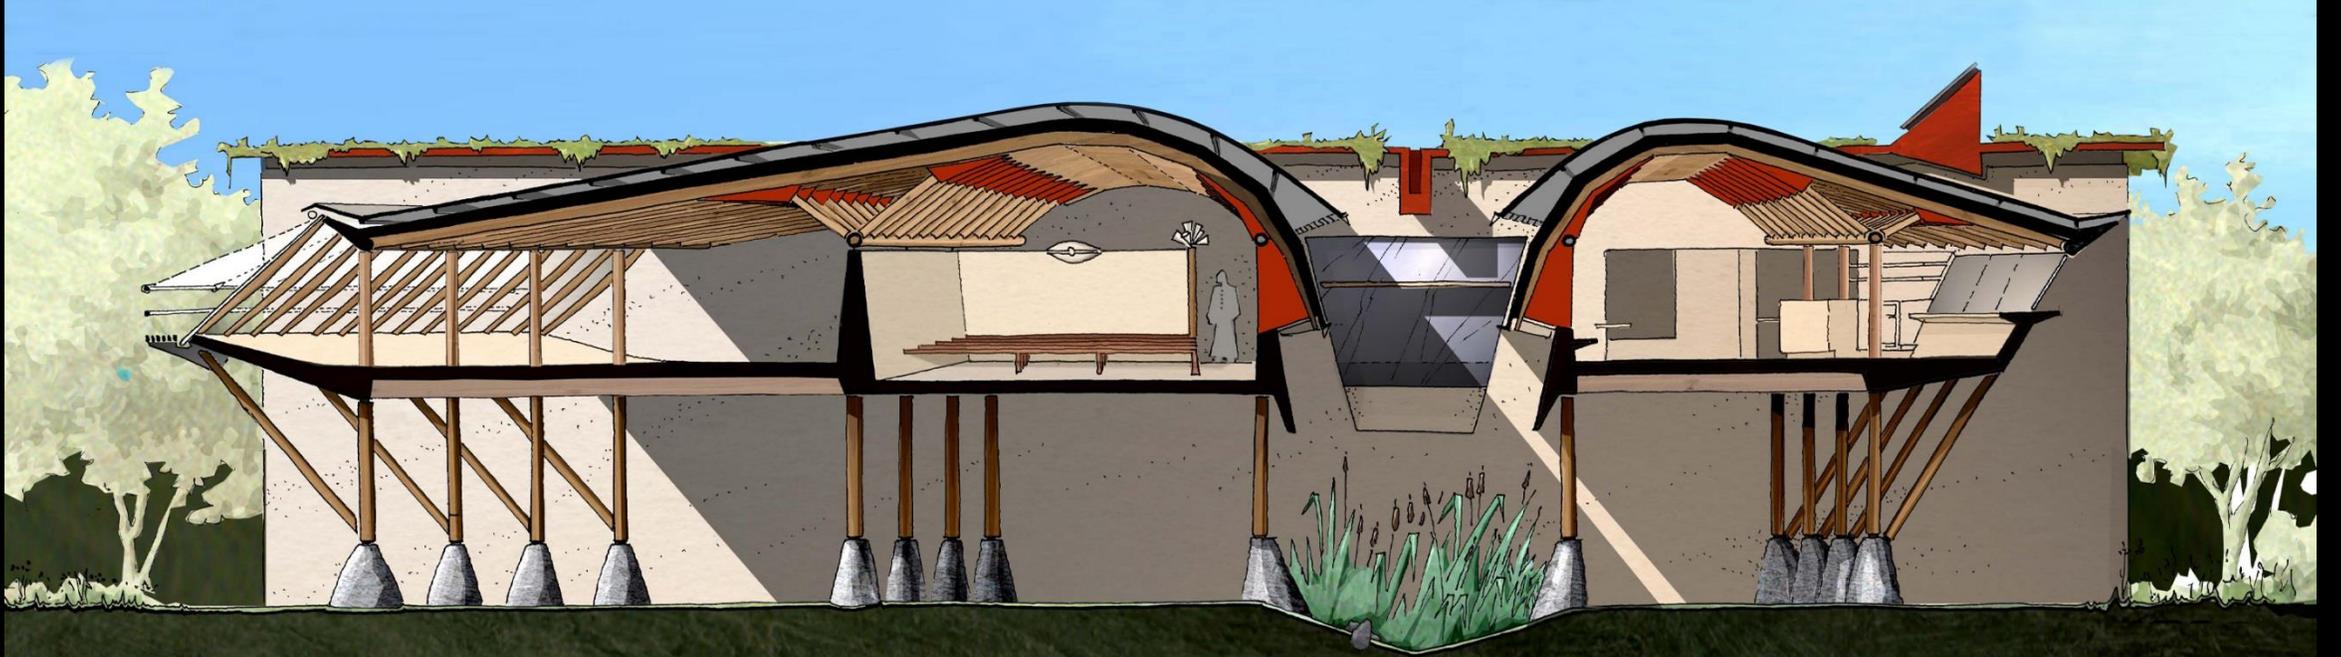

L'architecte
redécouvre le
vieux puits et
place l'arbre

Il en faut peu, je suis content :

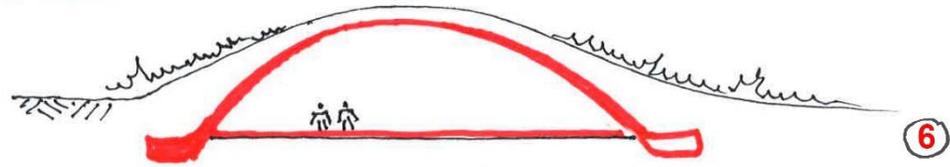

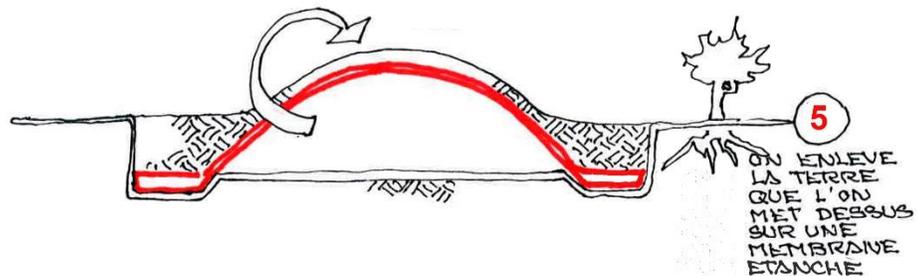

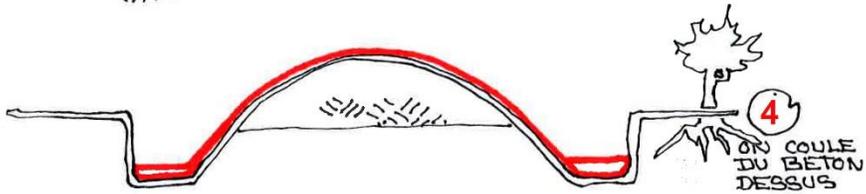

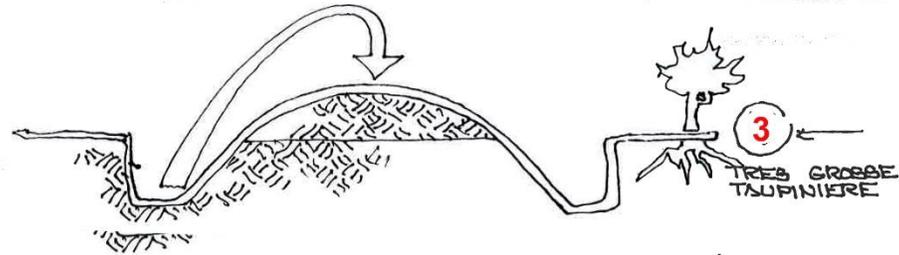

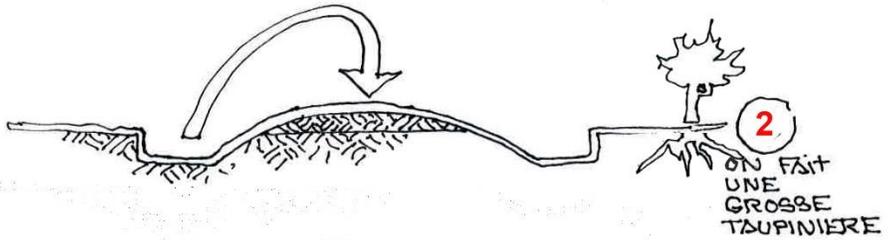

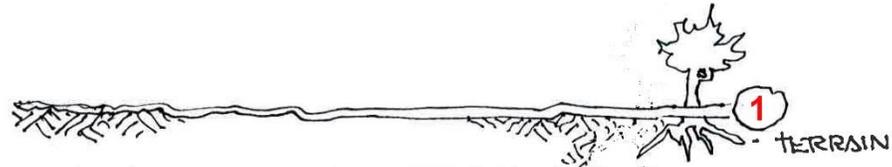

Je viens d'inventer l'évier à deux trous.
Dans le premier s'en va l'eau sale, branchée sur le réseau d'eau usée.
Dans le second, je verse l'eau qui juste, du bout de ses clapotis, a lavé la salade et file ainsi, joyeuse, humidifier un humus desséché.

L'ÉVIER
ORDINAIRE

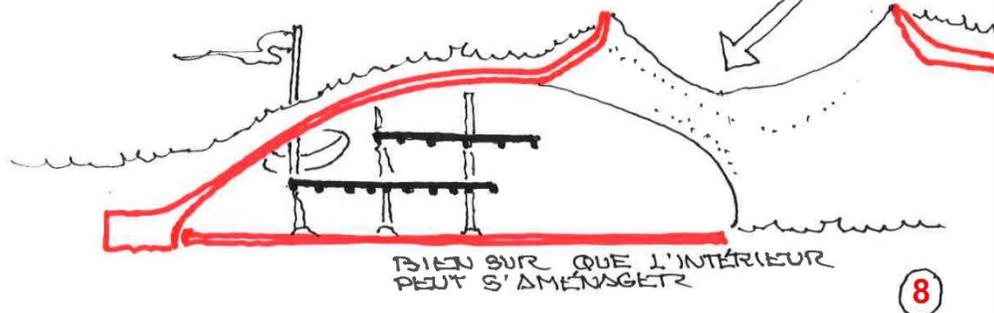

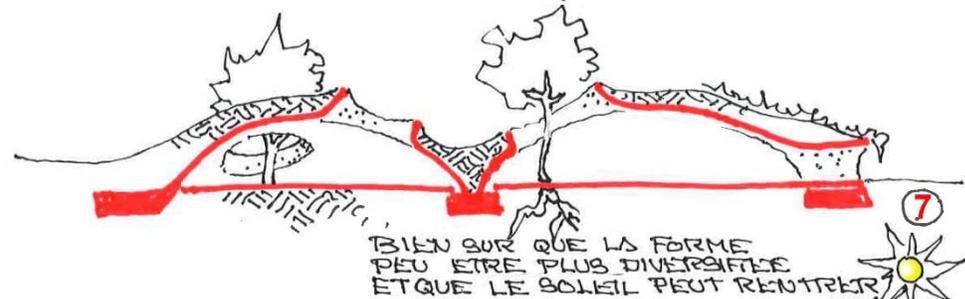

POUR NOTRE PROCHAINE ECOLE

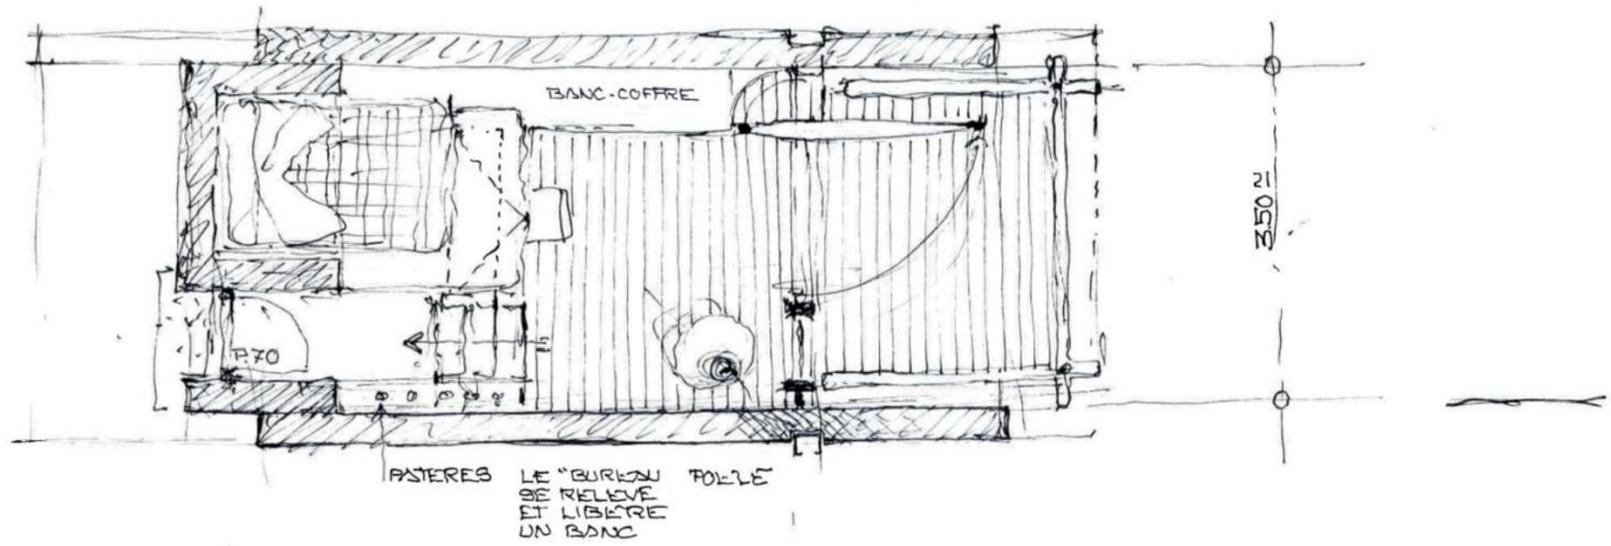

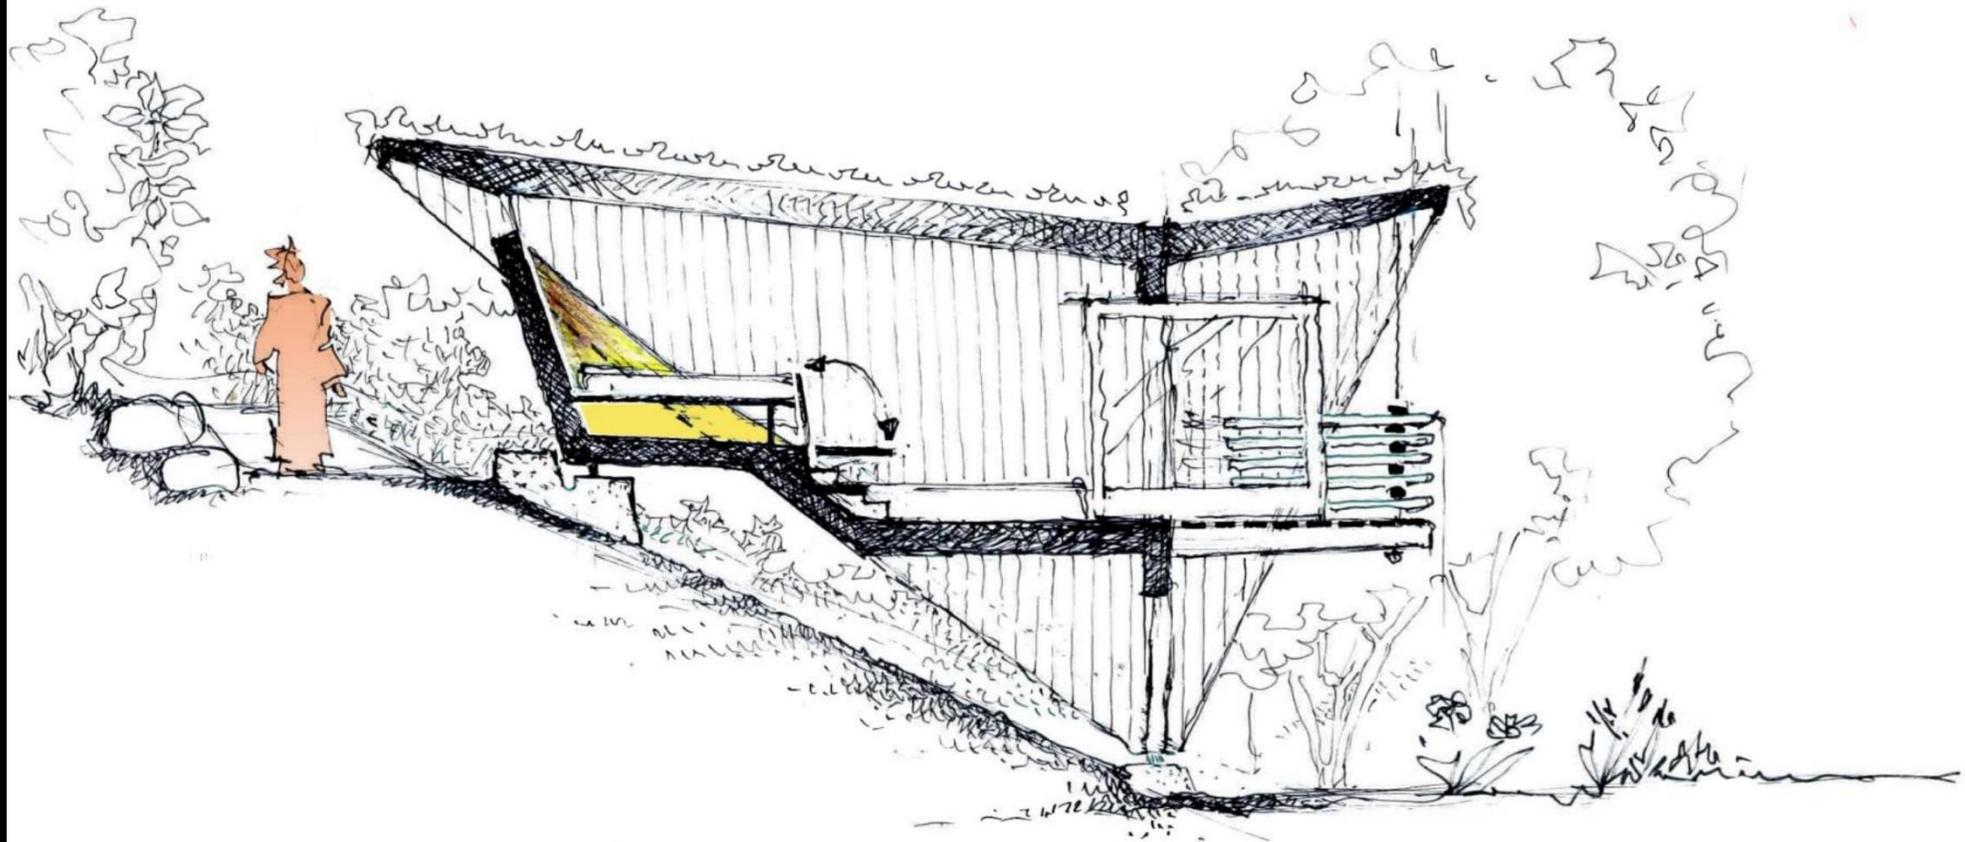

AU PLAFOND VOUTE LA MARQUE DES CAILLOUX LA COULEUR DE LA TERRE

EN ÉTAPE 1 ON A MIS DES TIRANTS EN TERRE AU NIVEAU DU FUTUR PLANCHER

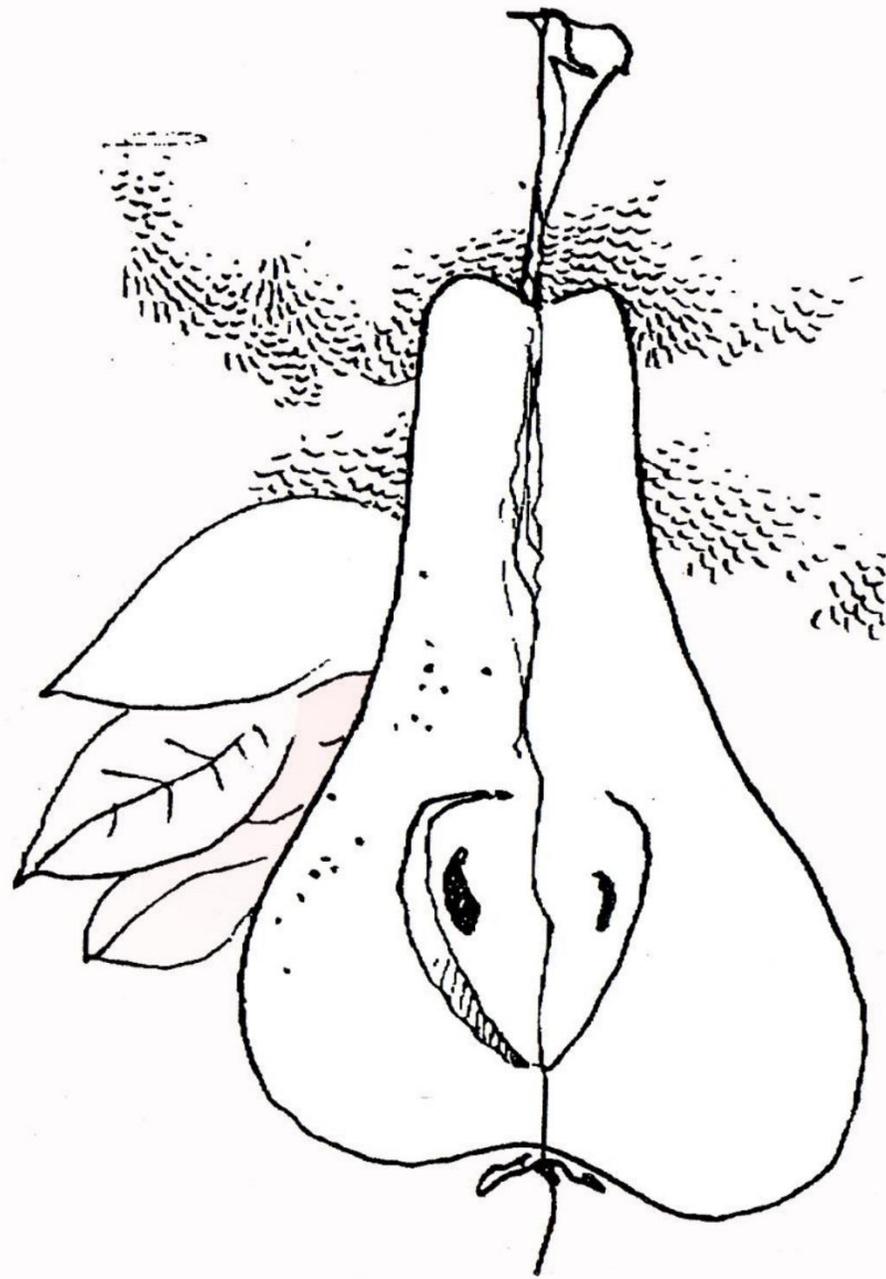

ON "MONTÉRAIT" DANS LA "COUR" QUI SERAIT UN "TERRAIN D'AVENTURE" CABOSSÉ.

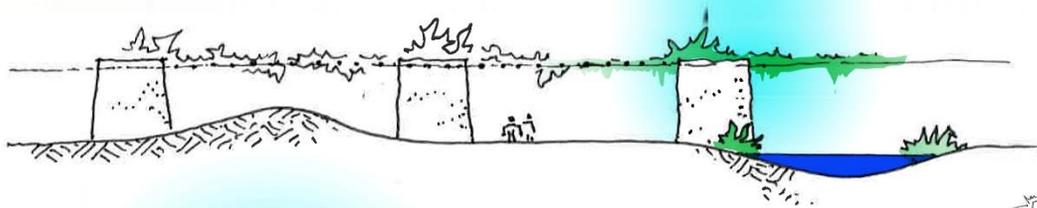

Le pépin contient l'information pour faire de nouvelles poires, c'est drôlement bien rangé....

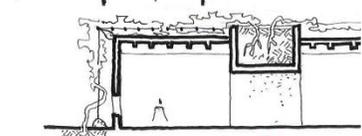

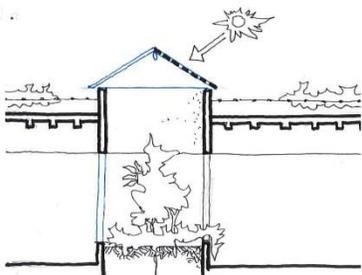

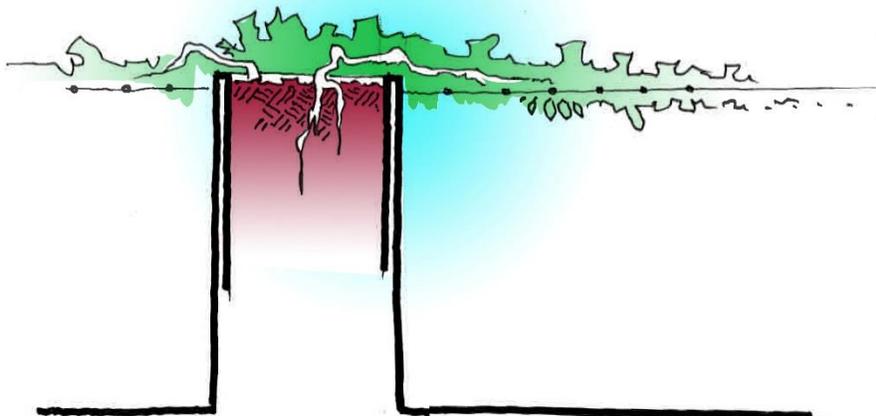

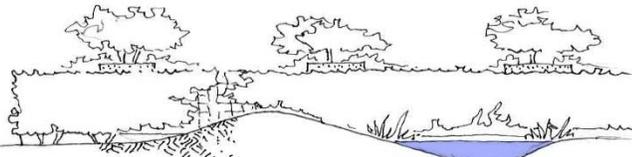

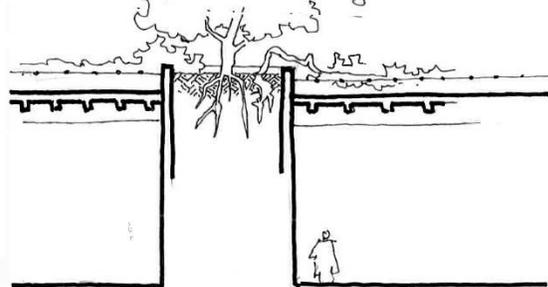

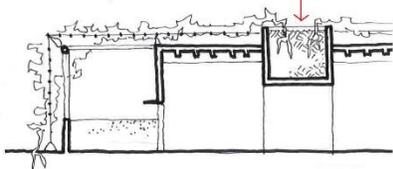

Ou peut imaginer que ces "grands pots de fleurs" qui haussent le vivant à hauteur de toiture sont en même temps blocs de stabilité :

stabilité structurelle et stabilité thermique (inertie)

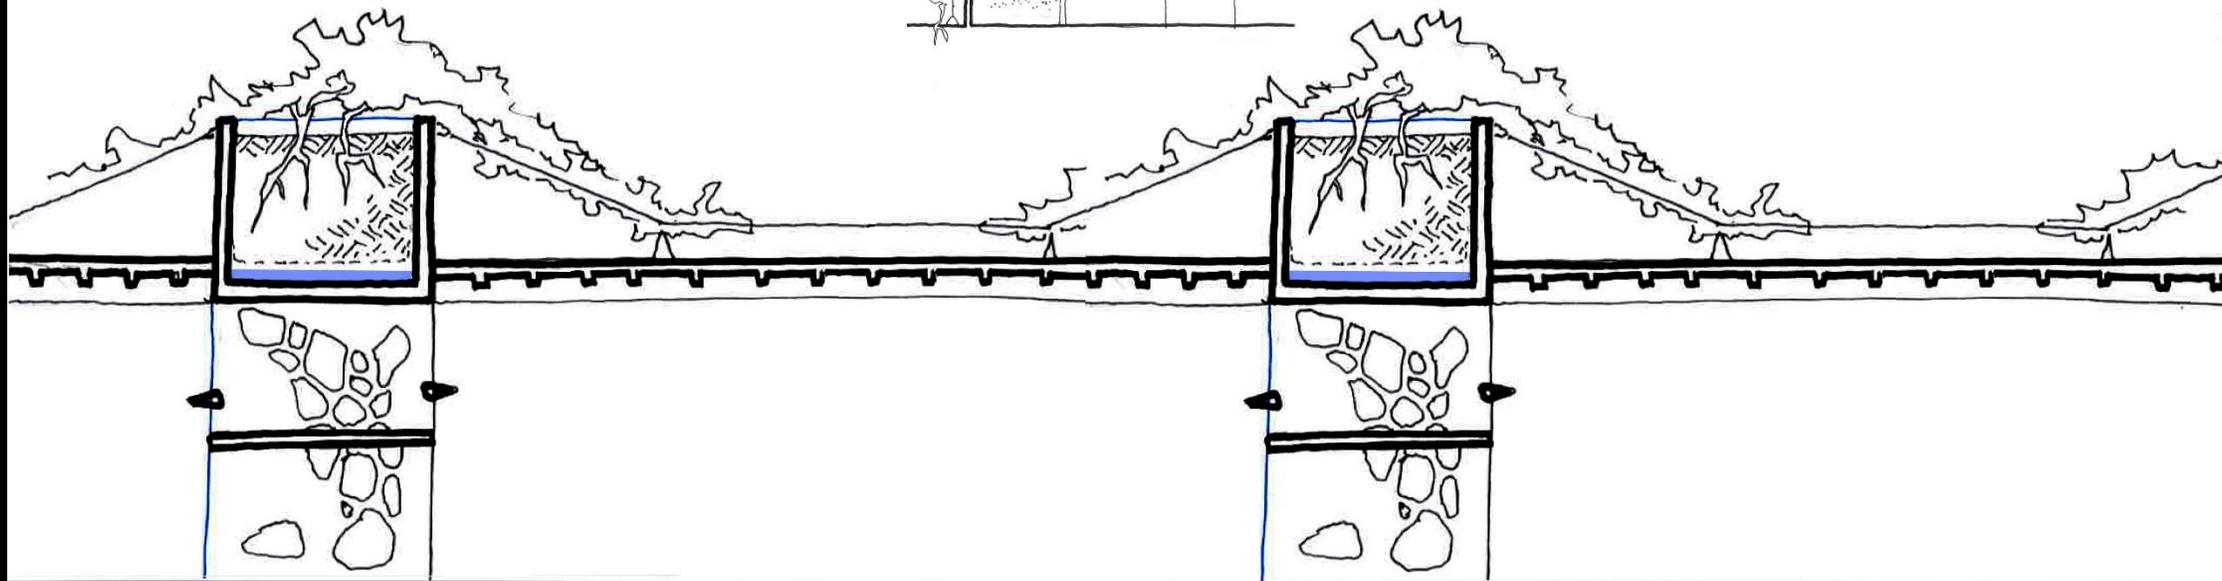

Ou peut imaginer aussi qu'ils sont l'annonce d'un jardin sur le toit.

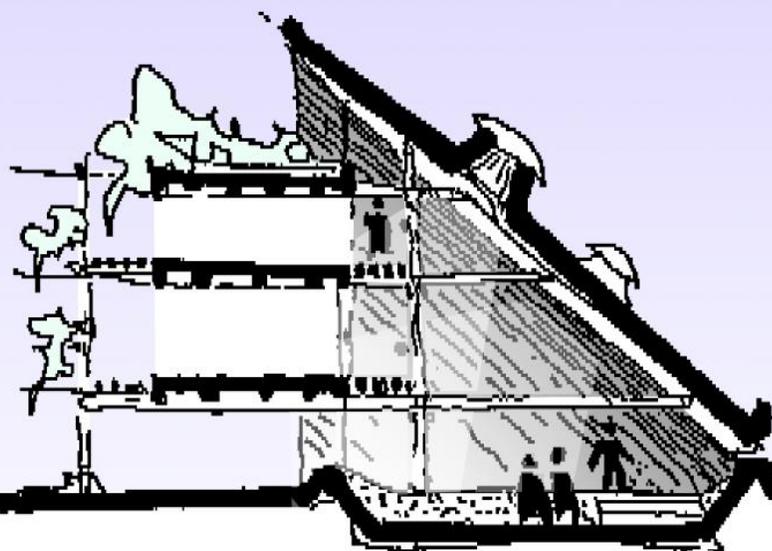

← Bonne base
Ce peut être comme ci
Ce peut être comme ça ...

Ce jardin sur le toit peut retomber en façade lui apportant l'énergie du soleil.

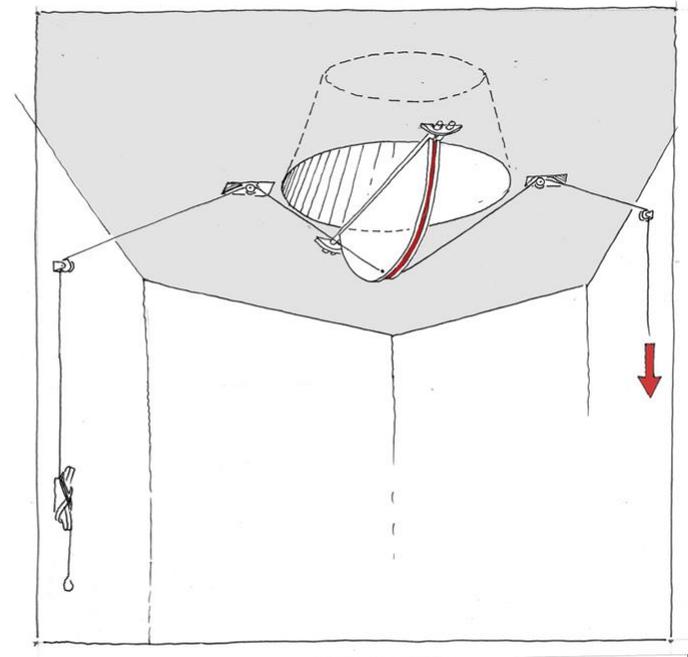

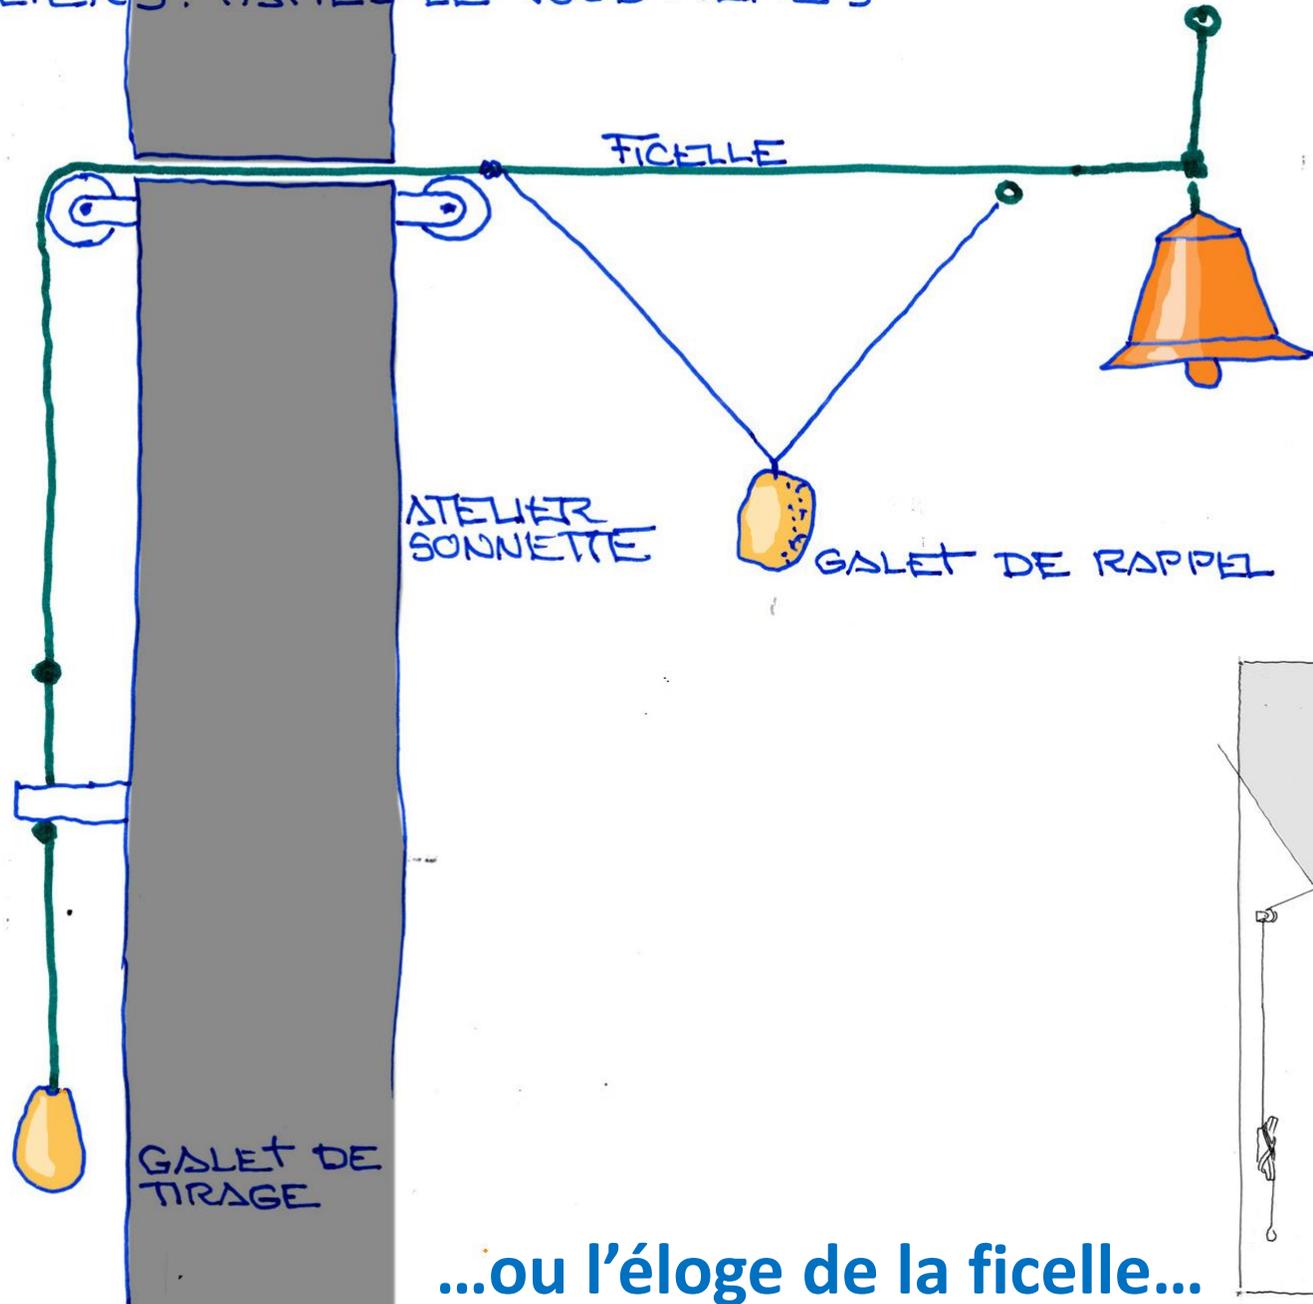

LA TRAMONTANE
(LE TOIT COMME UN CACHE-NEZ)

QUEST

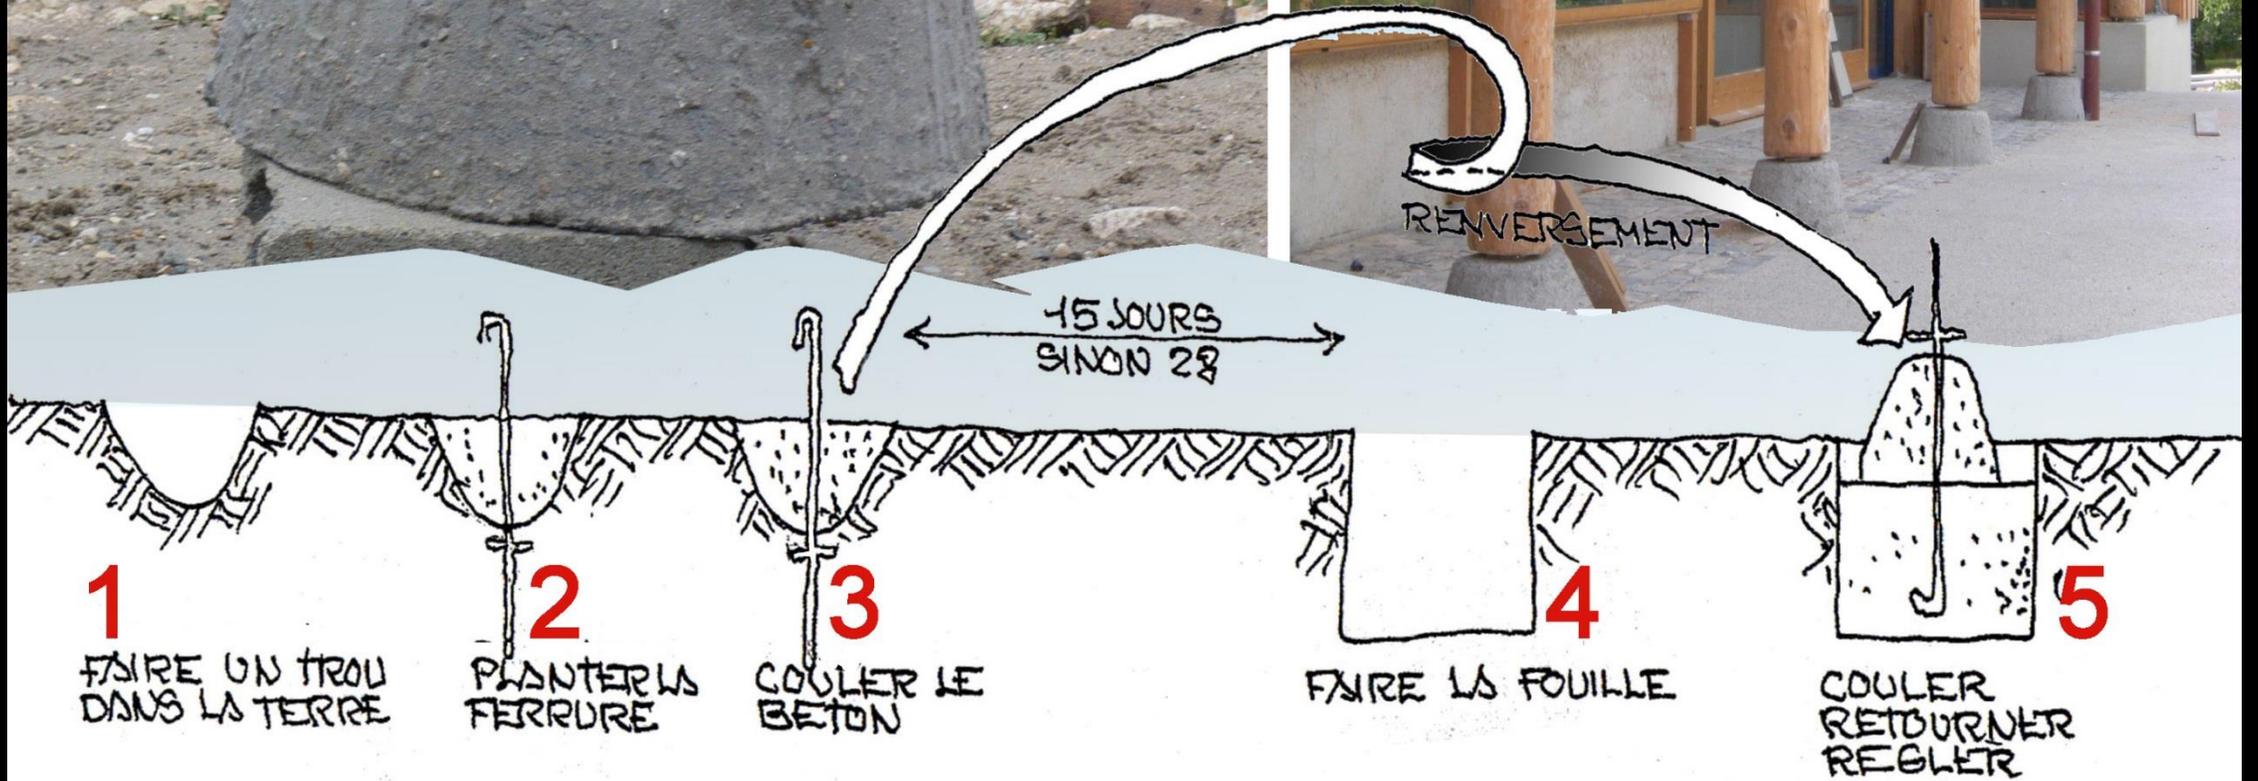

ATELIERS: "FAITES LE VOUS MÊMES"

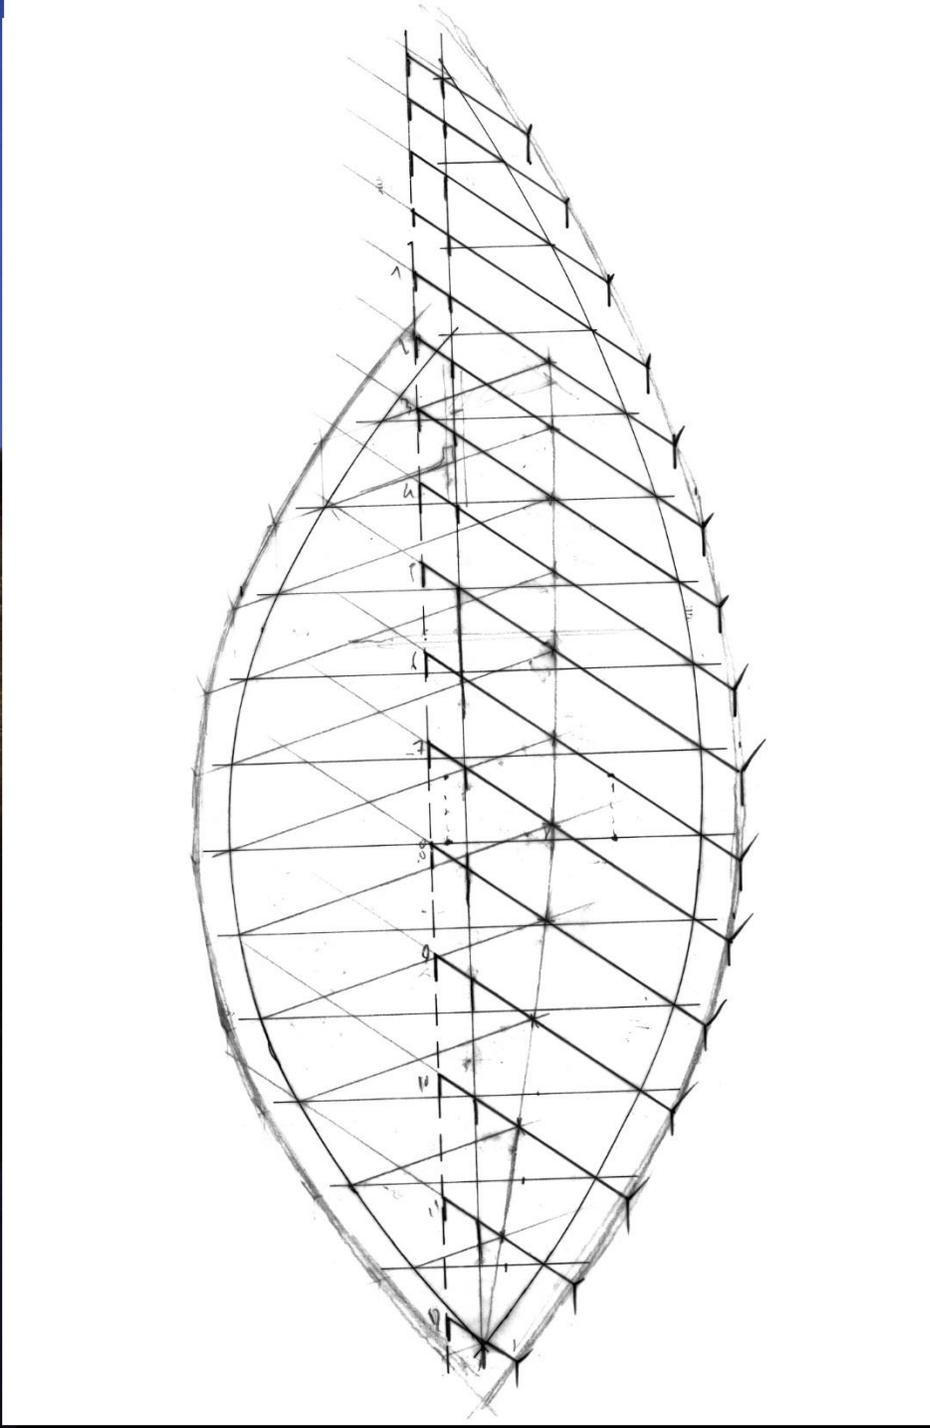

...ou l'éloge de la ficelle...

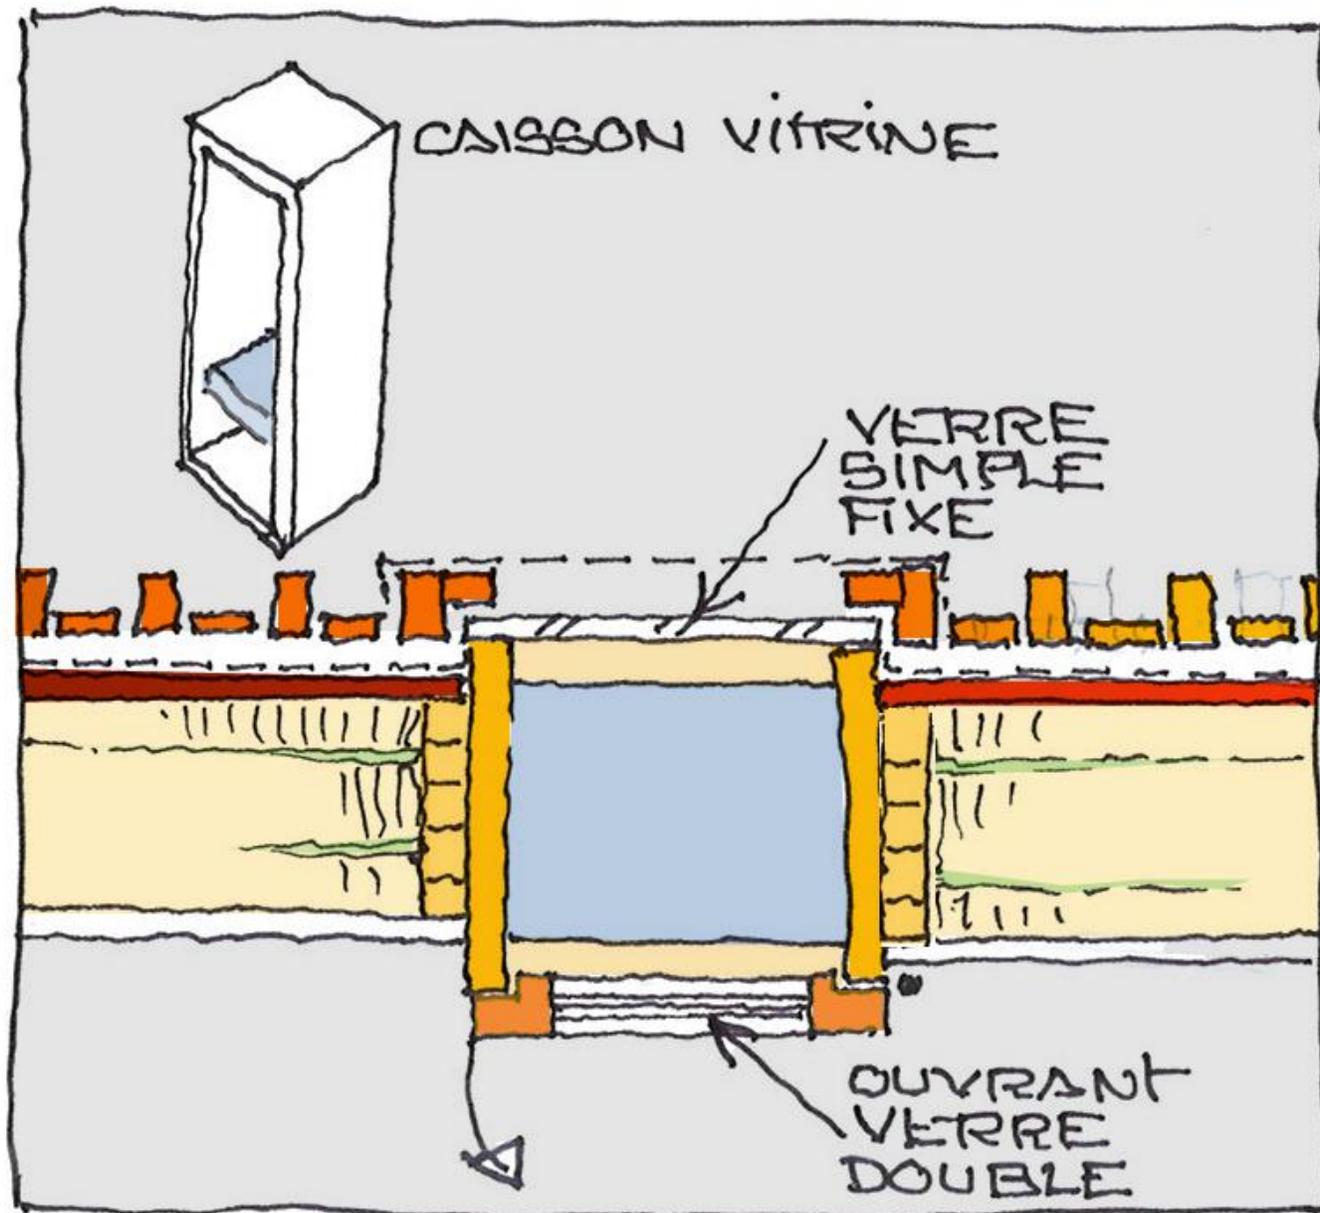

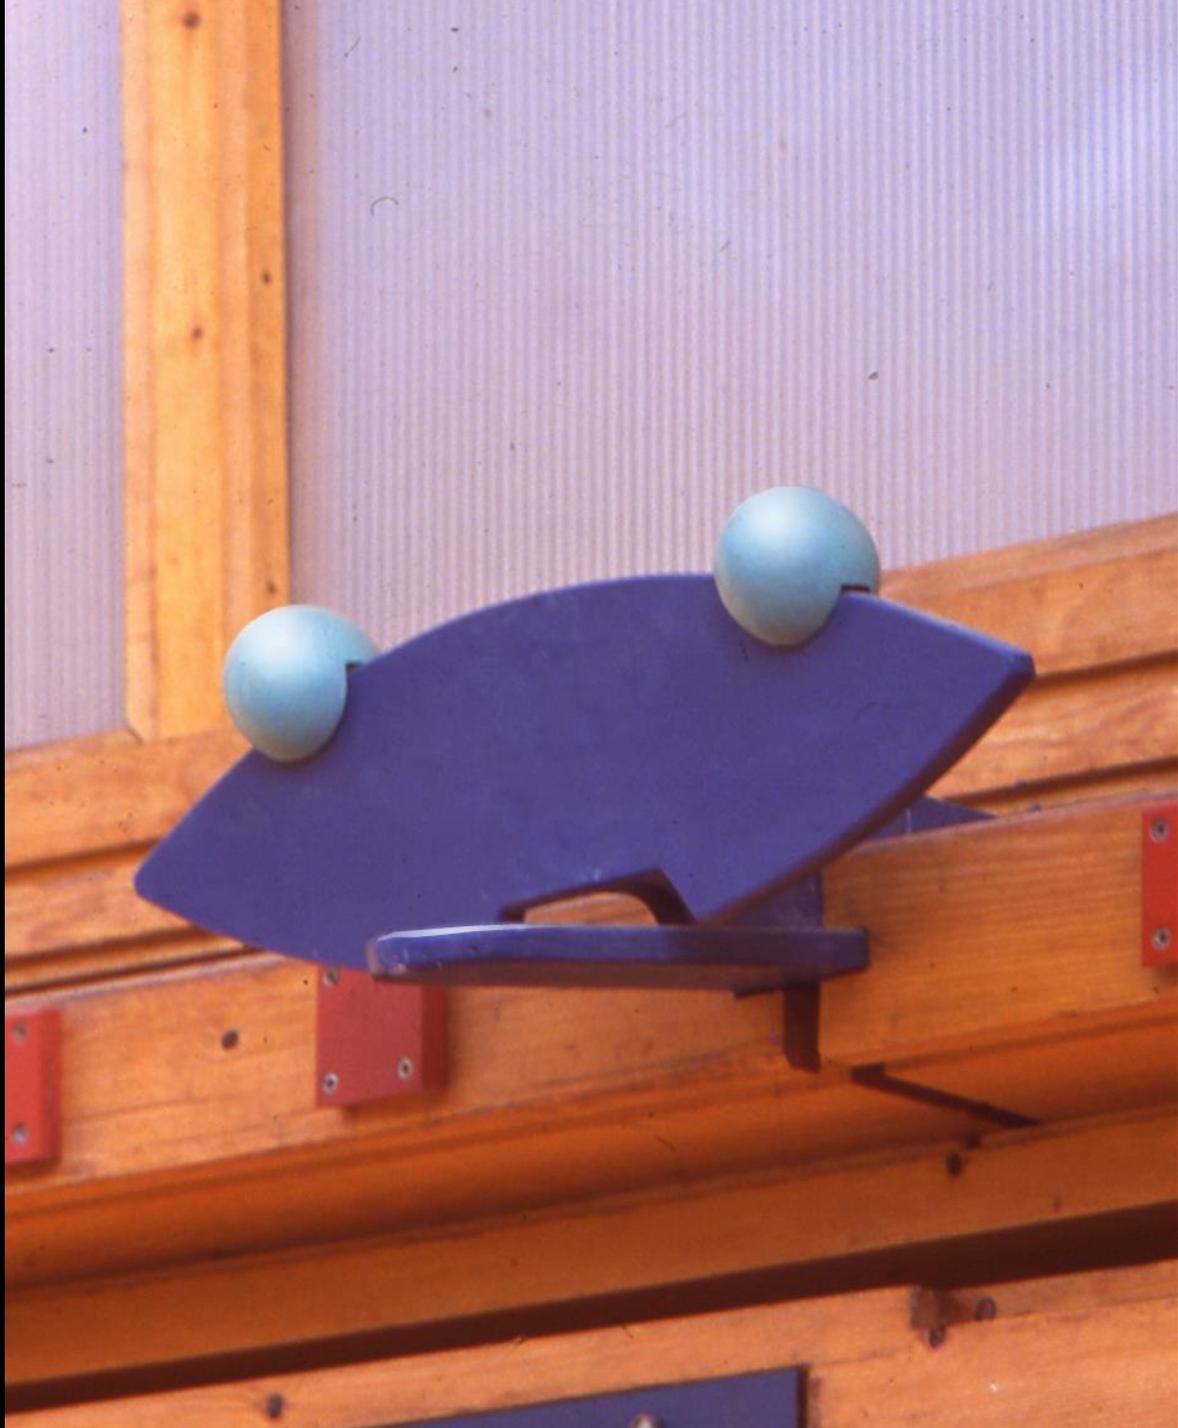

Trois ouvriers sur le chantier de la cathédrale taillent
chacun leur pierre....

Le premier gagne sa vie,

Le second taille un voussoir,

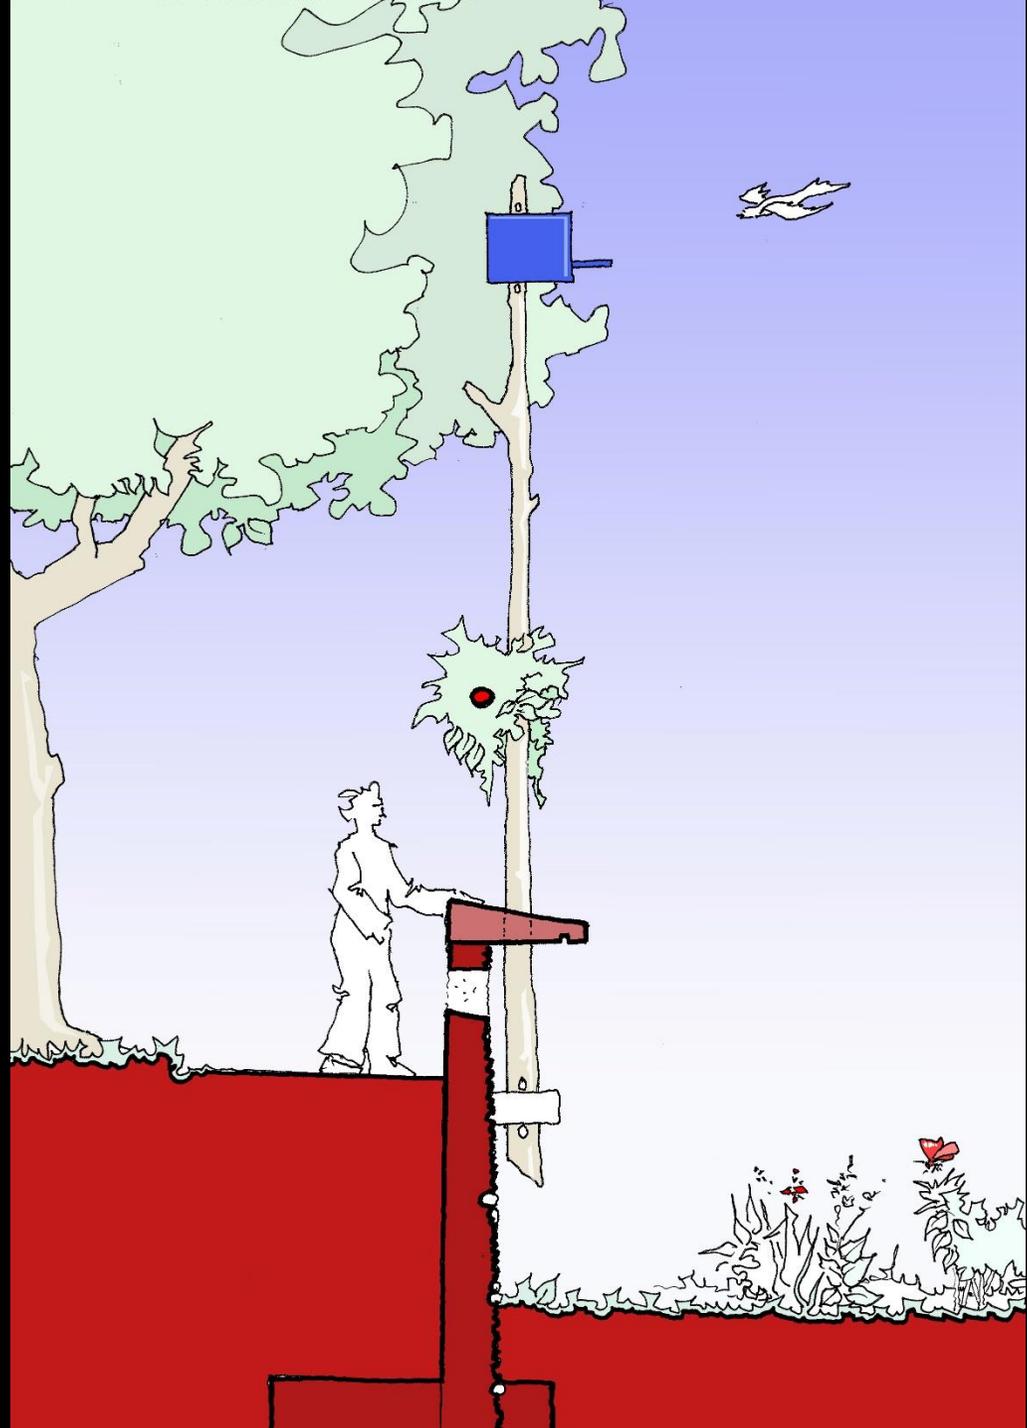

Le troisième construit une cathédrale....

**Réparer la terre...
...avec de la terre.**

Préparation du mélange terre-paille

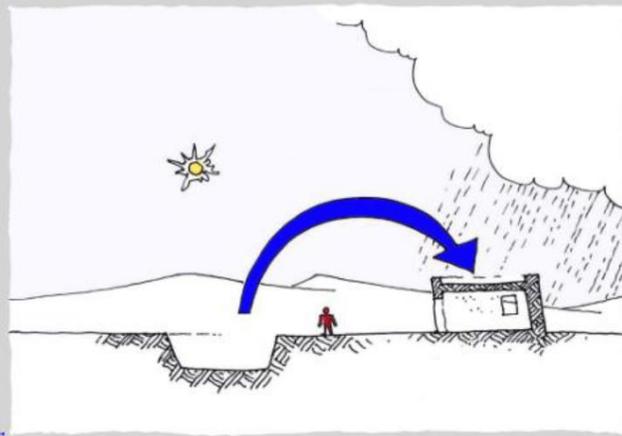

Chantier avant les enduits terre

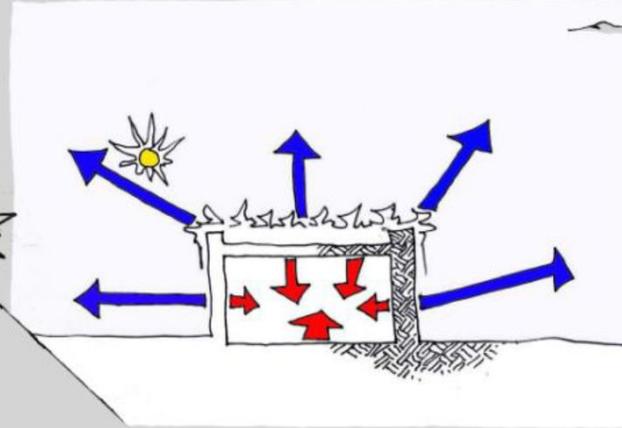

Vue de l'armature bois

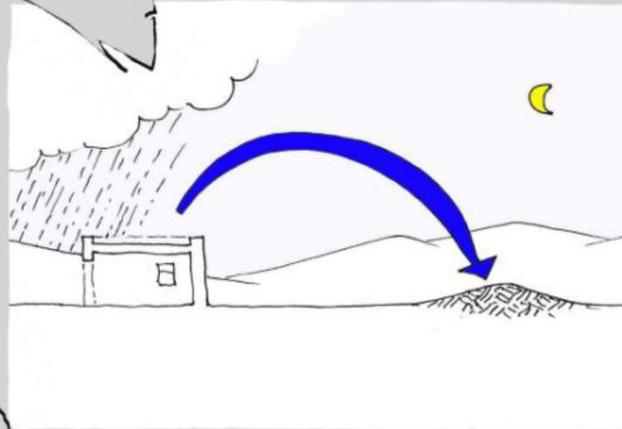

La pensée féconde navigue à la limite de son point de combustion : là où elle disparaît....

HIER...
